Summary

Computer Science undergraduate skilled in Java, SQL, and backend development fundamentals. Currently learning Spring Boot and REST APIs with hands-on experience in backend application development and problem solving.

Technical Skills

Programming Languages: Java, SQL, Python (Basic)
Backend: Spring Boot, REST APIs
Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Tools: Git, GitHub, VS Code

Projects

Complaint Management System

Present

Java, Spring Boot, MySQL

Developed a backend application for managing and tracking user complaints using Spring Boot and MySQL.
Implemented RESTful APIs for complaint creation, status updates, filtering, and issue management.
Designed layered architecture using Controller, Service, and Repository patterns.

Notes Management API

Present

Java, Spring Boot, MySQL

Built a backend note management application using Spring Boot and MySQL.
Developed CRUD-based REST APIs for note creation, updating, deletion, and category-based organization.
Implemented modular backend structure with database integration and API testing using Postman.

Achievements

Coding Profile

Codeforces

Achieved **1250+ rating** on Codeforces with strong problem-solving skills in data structures and algorithms.
